DMEGC Solar

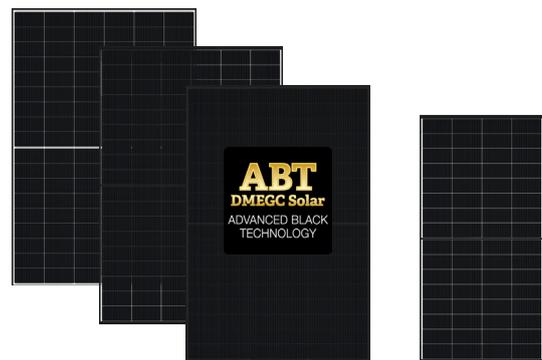

Product advantages

DMEGC Solar was founded in 1980 and is a renowned manufacturer of photovoltaic modules with headquarters in China and offices all over the world – including Europe. Thanks to sustainable development and the consistent integration of sustainability goals in the production, DMEGC is regarded as a pioneer in terms of environmental friendliness.

DMEGC's solar modules stand out due to their excellent technology and high quality, which is based on many years of experience and continuous research. Some module series offer a particularly elegant design thanks to specially developed manufacturing processes – ideal for customers with high demand to the product's design.

With a worldwide service network and a high standard of customer satisfaction, DMEGC offers reliable support and fast service, no matter where the projects are located.

Leading in service and technology

- Infinity RT product series with N-Type technology, available in various designs and power classes
- Fullblack solar module with specially developed “Advanced Black Technology” for a particularly homogeneous appearance
- Worldwide service network with local offices, which also ensures long-term services
- Continuous increase in module output through the introduction of modern production processes

High quality and durability

- Awards for outstanding quality from EUPD Research as “Top Brand PV Module” and from PVEL as ‘Top Performer’ in the photovoltaic manufacturer category
- 25-year product warranty and 30-year performance warranty
- High hail and fire protection class

Sustainability and transparency

- Awarded an EcoVadis medal for sustainable corporate governance and responsible supply chains
- Low-carbon development and production – three of the production sites use 100 % green electricity (TÜV Süd-certified)
- Traceability of raw materials and products – from silicon to the entire module
- Less ammonia and nitrogen emissions during production

Financial stability

- One of the leading companies in terms of financial strength among solar companies (Altmann-Z Score Index)
- Consistently ranked as a Tier 1 module manufacturer by BloombergNEF
- Stable and robust sales growth in recent years due to excellent product performance and reliability
